Fail-Safe Technology since 1995.

The Oil Smart® Simplex Total Pump Protection Panel is an Oil Prevention control system that provides maximum pump protection and includes the Oil Smart® Pump Controller and Alarm. The system shall pump water only and shall automatically alarm in the event of high liquid in the sump. The system provides an alarm in the event of high oil or high water, identifying which liquid is present. The system is complete with a no load lockout feature, circuit breaker, and smart fault condition signals that work in conjunction with any fault signal provided by any pump or secondary containment system for complete protection.

MODEL	HP	VOLTS	*TOTAL PUMP PROTECTION
<i>SINGLE PHASE</i>
