

Single Phase Oil Smart® NEMA 4X Simplex and Alarm Panels

The Oil Smart® Simplex System automatically pumps water from elevators, transformer containment areas, underground vaults, marine and other applications without the risk of pumping oil into the environment. The system provides information to building management or maintenance personnel about leak or high liquid level conditions in the sump. The alarm will sound if a high liquid condition occurs and then indicate if oil or water is present. Installation of the Oil Smart® System allows you to comply with State and Federal regulations while reducing the risk of adverse publicity, fines and expensive cleanup costs.

Models

OSSIM-30

OSSIM-30-CB (Includes pump 20 Amp circuit breaker)

Single Phase 120/208/240VAC 50/60Hz

Operates pump up to 1hp @ 120V, up to 3hp @ 208/240V

Features:

- Oil Smart® Pump Control and Alarm Sensor differentiate between oil and water; no moving parts, patented electronic controls.
- Indoor/Outdoor NEMA 4X heavy duty polycarbonate enclosure: 10"x8"x4", UL-50 Type 6P Listing
- CSA International Certified No. 229594
- High Liquid Alarm with test and silence features, high red beacon alarm light, white light for water present, yellow light for oil present, high 85 decibel audible alarm, and power on light indicator.
- Separate dry contacts for remote monitoring: oil, water, high liquid.
- Hand-Off-Auto (HOA) Toggle Switch, Green Light indicator for pump run
- Oil Smart® Pump Switch with 20' cord and Liquid Smart® Alarm Switch with 20' cord. Mounting hardware included.
- Alarm and Pump Control are powered by two separate power sources to provide true high liquid emergency alarm (can use same power source).

Applications:

- Elevator Sumps, Transformer Containment Areas, Underground Vaults
- Any application where there is a need to remove water while containing oil.
